

**FOR IMMEDIATE RELEASE:****Announcing the First Latin American Academic Affiliate of Watson Caring Science Institute: Universidad Santo Tomás School of Nursing, Santiago Chile**

DEERFIELD BEACH, FL September 2025 – The Watson Caring Science Institute (WCSI) and the **Santo Tomás University School of Nursing (UST)** Santiago, Chile are proud to announce a historic academic affiliation, marking the first time a nursing school in Latin America has achieved this distinction. This milestone positions UST as a regional leader in nursing education, committed to integrating caring science theory with modern science and technical skills.

The affiliation ceremony, held virtually with Dr Jean Watson Founder, Director WCSI, celebrated a new era for nursing students at UST, who will now have access to international-standard education, including specialized courses, content, and resources from WCSI, a global leader in Unitary Caring Science.

"This collaboration clearly highlights our priority as educators: to integrate the science of care as a fundamental aspect of the identity and practices of future nurses from the Universidad Santo Tomás," said **Andrea Solís, Dean of the Faculty of Health at UST.**

This partnership will empower UST nursing students to participate in international projects, research, and events, significantly enhancing the prestige and visibility of the School of Nursing. By fostering the development of social-emotional skills such as empathy, active listening, and effective communication, the program aims to train professionals who can provide holistic care that addresses the body, mind, and spirit of each individual.

"We want every nurse trained at Santo Tomás to possess not only outstanding technical knowledge but also the ability to observe, listen, and support each individual with respect, dignity, and compassion," emphasized **Claudia Ibarra, National Director of the UST School of Nursing.**

The partnership also aligns with Dr. Jean Watson's vision of co-creating "*Global Caritas-Communitas networks*" that unite nurses across time and space, fostering a new level of compassionate consciousness.

By becoming the first educational institution in Latin America to join WCSI, UST reaffirms its commitment to preparing professionals who are not only ready to tackle current health challenges but are also equipped to lead with human caring and compassion in the future of healthcare.

ENDS
